14 June 1963

Dear John:

As you may recall our proposal on the Coherent Light Enlarger included a requirement for a GFE 40" T/5 lens for use in the breadboard. We are currently under contract to  Fort Worth on their order number 174615 under AF 33(600)-40845 to refurbish two of these lenses picked from a group of seven which are currently on hand here as GFE under the Convair order. We believe one of these lenses (Serial No. 267) will be suitable for the breadboard unit and recommend that it be diverted for this use until approximately 1 July 1964. Can you take the necessary steps to arrange this?

PS: In order to maintain the schedule mentioned in the proposal, we will require authority to divert this lens not later than 21 June 1963.
